Summary

Software Engineer specializing in Frontend Development with over 4 years of experience building scalable, user-centric interfaces with React.js and Next.js. My expertise combines deep technical skills with a proven ability to lead project execution and guide development teams. I excel at translating business strategy into technical roadmaps, managing agile workflows, and fostering collaboration between developers and stakeholders to ensure timely, high-quality delivery. I am passionate about taking ownership of features from concept to completion, driving both technical excellence and successful project outcomes. I am dedicated to delivering high-quality, maintainable solutions that address real business needs—whether by building innovative features or leading efficient project execution.

Professional Experience

Software Engineer – Frontend, *Audit Station*　　　　　　　　　　03/2024 – Present │ Dubai, UAE
- Led a team of 10 developers to build and enhance two internal platforms using React and Next.js.
- Directed the development of 30+ features, from documenting requirements to final deployment.
- Managed the team's Agile workflows (sprints, task tracking), reducing delivery time by ~30%.
- Improved application performance by 45% through advanced rendering and code splitting.
- Increased user engagement by **30%** with responsive and accessible layouts
- Enhanced code quality and raised test coverage by **25%** across the team.
- Directed backend collaboration to refine API design, ensuring a more stable UI

Frontend Developer, *OSOSS*　　　　　　　　　　　　　06/2023 – 11/2023 │ Remote│Kuwait
- Collaborated with a cross-functional team of over 10 stakeholders to obtain endpoint APIs for ERP system analysis and seamless integration.
- Developed 5+ innovative features enhancing system functionality.
- Refactored core modules, improving readability, maintainability, and reducing code duplication by 35%
- Actively contributed to Agile workflows through sprint planning, reviews, and retrospectives

Frontend Developer, *Perla Tech*　　　　　　　　　　　05/2023 – 06/2023 │ Damascus, Syria
- Architected and enhanced a full e-learning platform, improving structure, performance, and user experience.
- Achieved 90+ scores on Google Lighthouse and Web Vitals through performance optimization and accessibility improvements.
- Created 20+ reusable UI components using React Query, Redux Toolkit, and MUI to ensure maintainability and consistency.

Frontend Web Developer, *Future Code*　　　　　　　　　09/2022 – 05/2023 │ Damascus, Syria
- Developed 7 projects spanning websites to dashboards with HTML, CSS, JavaScript, and React.
- Created 2 e-commerce websites from inception to delivery, managing all phases.
- Designed 5 project-specific dashboards and 2 reusable templates using React, Bootstrap, and MUI

Frontend Developer, *IT-LAND Technologies*　　　　　　　04/2021 – 09/2022 │ Damascus, Syria
- Improved responsiveness and reduced page load times by 20% across devices.
- Crafted reusable React components, reducing future development time by 25%.
- Streamlined frontend-backend integration and optimized Git workflows, cutting merge conflicts by 20%.

Education

Bachelor of Information Engineering Technology,   01/2018 – 03/2023 | Damascus
Syrian Virtual University ⧉

Technical Skills

Frontend Frameworks/Libraries
- React.js
- Next.js
- Material UI (MUI)
- Tailwind CSS
- Chakra UI

Development Methodologies
- Agile
- Scrum

Architecture & Best Practices
- Front-End Architecture
- Code Review
- Test Coverage
- Design Patterns
- Performance Optimization (Advanced Rendering, Code Splitting, Refactoring)

Version Control
Git

State Management
Redux Toolkit
React Query
Context Api

Project Management Tools
- Odoo
- GitLab
- Trello

System Integration
- ERP System Integration
- Seamless UI-to-Backend Data Flows
